

ASSIGNMENT-1

TASK-1

AUGUST 9, 2026

Created By ~Pintu mer

1. Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

1. Inkjet Printer

Simple Explanation:

An Inkjet Printer uses small drops of ink to print text and colorful pictures on paper.

Real-Life Use:

Printing college assignments, documents, and color photos.

2. Laser Printer

Simple Explanation:

A Laser Printer uses toner powder to print documents quickly and clearly.

Real-Life Use:

Printing office reports, bills, and many documents.

3. Dot Matrix Printer

Simple Explanation:

A Dot Matrix Printer uses small pins to hit an ink ribbon and print characters on paper. It can also print through multiple copies of paper.

Real-Life Use:

Used for printing **invoices, receipts, bills, and delivery documents** in shops and offices.

1. Flatbed Scanner

Simple Explanation:

A Flatbed Scanner scans documents and photos by placing them on a glass surface.

Real-Life Use:

Used for **scanning certificates, photos, and important documents.**

2. Sheet-fed Scanner

**Simple Explanation:**

A Sheet-fed Scanner automatically pulls the paper through the scanner to scan it.

Real-Life Use:

Used for **scanning many office documents quickly.**

3. Handheld Scanner

**Simple Explanation:**

A Handheld Scanner is a small scanner that you move by hand over the document or image to scan it.

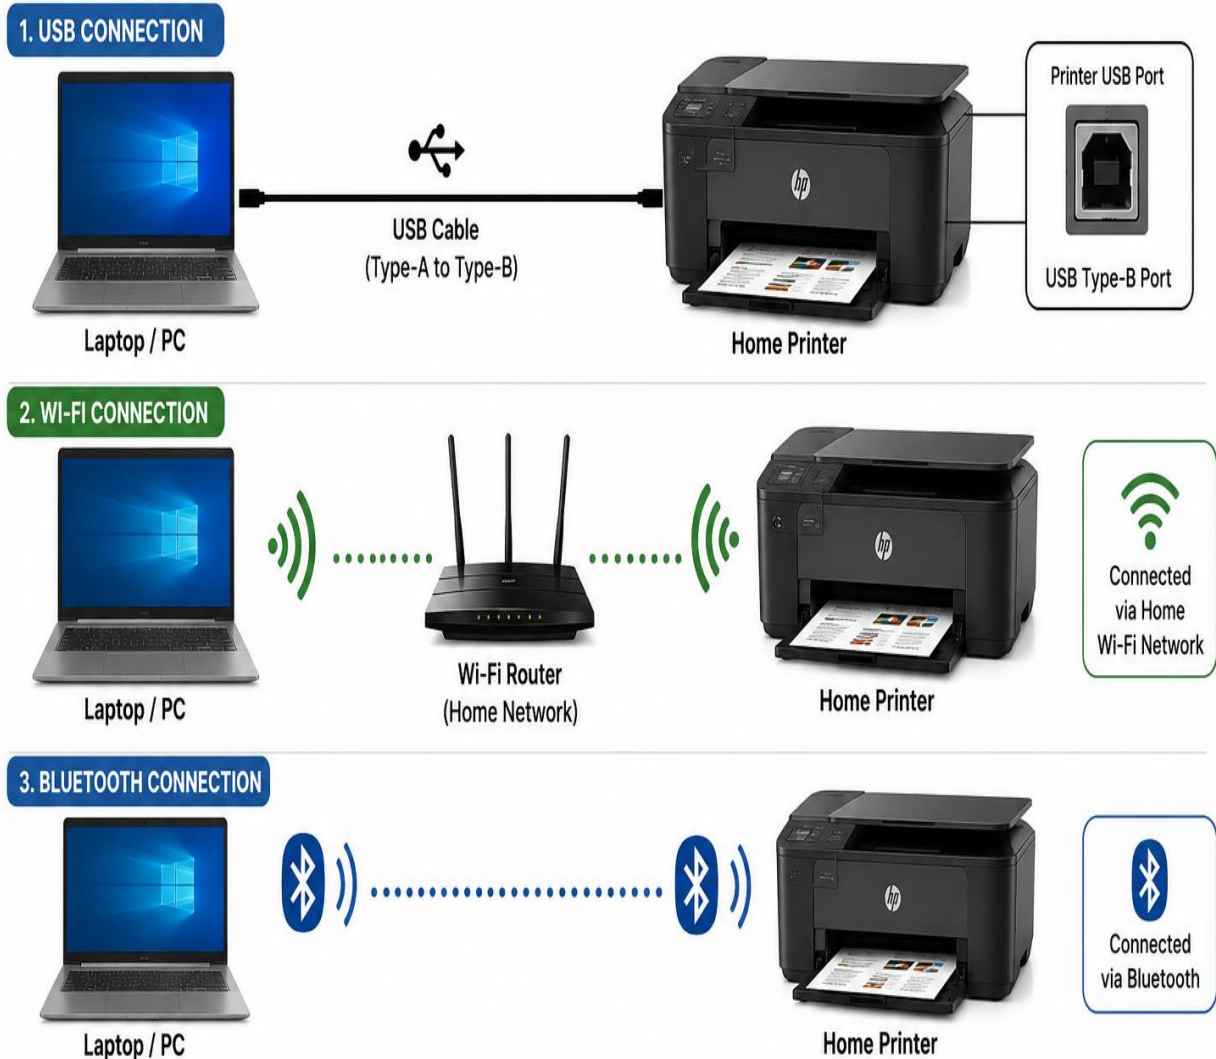

Real-Life Use:

Used for **scanning small documents, receipts, barcodes, and books.**

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

How a Home Printer Connects to a Laptop or PC

Typical Connection Interfaces

SUMMARY

1 **USB Connection**
Direct cable connection using USB Type-A to Type-B cable.

2 **Wi-Fi Connection**
Wireless connection through a Wi-Fi router (home network).

3 **Bluetooth Connection**
Direct wireless connection using Bluetooth.

Legend

- USB Cable
- Wi-Fi Connection
- Bluetooth Connection

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Hint: Think about speed, convenience, and compatibility.

Connection Interface	Advantage	Disadvantage
USB	Fast and reliable connection; works with most computers.	Requires a cable and a free USB port.
Wi-Fi	Wireless and convenient; multiple devices can connect to it.	Needs a Wi-Fi network and may be slower if the signal is weak.
Bluetooth	Wireless and easy to connect for short distances.	Shorter range and generally slower than USB.

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

How to Connect a Printer to a Computer

Connection Method: USB Cable

1. Turn ON the printer.
2. Put paper in the printer.
3. Take the USB cable.
4. Connect one end of the USB cable to the printer.
5. Connect the other end to the computer/laptop.
6. Wait for the computer to detect the printer.
7. If needed, install the printer driver.
8. Go to Settings → Printers & Scanners.
9. Check that your printer name appears.
10. Print a test page.

✓ Now your printer is ready to use.
